SUSTAINABLE
FARMS

HEALTHY FARMERS, HEALTHY FARMS, HEALTHY PROFITS

Managing rocky outcrops for biodiversity & farm health

Free field day, Thursday 2 April 2020

Rocky outcrops are a valuable natural asset that, when managed to encourage revegetation, can boost healthy farm ecosystems.

Join us for this FREE field day, BBQ lunch included, to find out more about how you can protect and utilise rocky outcrops for maximum benefit on your farm.

Speakers:

- Dan Florance, Ecologist, Sustainable Farms. Will share his knowledge on managing rocky outcrops, identifying reptiles & their habitat.
- Sue Wakefield, Nursery Manager & Biodiversity Officer with Central Tablelands Landcare. Sue will draw on her 30+ years experience to talk about effective tree planting for revegetation & fauna friendly fencing.
- Saul Cunningham, Professor and pollination expert at ANU. Saul will talk about how to encourage insect pollinators and the role they can play in healthy grazing and cropping enterprises.

Rocky Outcrops Field Day

When: 10am-3pm, Thursday 2 April, 2020

Where: 312 O'Connell Plains Road, O'Connell NSW

Details: BBQ lunch provided; please BYO chair.

Registration essential. For enquiries and to RSVP contact:
